

Maharashtra State-Level Sprint Results Research

One Nation One Athlete — verified benchmark/result dataset for Athletics → Track → Sprint

Research date: 8 October 2026

Primary source: Maharashtra Athletics Association (MAA), affiliated to the Athletics Federation of India and Maharashtra Olympic Association. MAA's official results archive contains Maharashtra state senior, U23, junior and sub-junior competitions from multiple years.

Important distinction: the tables below are **competition results**. They should not be labelled as official Maharashtra state records unless separately verified from the federation's record list. For your app, store CompetitionResult and StateRecord as separate entities.

1. Dataset to build first

Level / Category	Event	Sex	Recommended use
State Senior	100m	Men/Women	Senior state benchmark
State Senior	200m	Men/Women	Senior state benchmark
State Senior	400m	Men/Women	Senior state benchmark
State U23	100m	Men/Women	Age-specific benchmark
State U23	200m	Men/Women	Age-specific benchmark
State U23	400m	Men/Women	Age-specific benchmark
State Junior U20	100m	Men/Women	Junior benchmark
State Junior U20	200m	Men/Women	Junior benchmark
State Junior U20	400m	Men/Women	Junior benchmark
State Junior U18	100m	Men/Women	Youth benchmark
State Junior U18	200m	Men/Women	Youth benchmark
State Junior U18	400m	Men/Women	Youth benchmark

MAA's results archive explicitly lists the 2024 Senior State Meet, 2024 U23 State Meet, 2024 Junior Championships, 2025 Junior Championships and 2025 U23 meet, among many earlier state competitions.

6. What the PDF shows about your required state comparison system

Step	Filter / calculation	Example
1	Sport	Athletics
2	Discipline	Track → Sprint
3	Event	100m
4	Sex	Men
5	Age category	U20
6	Competition level	State
7	Geography	Maharashtra
8	Time period	Selected season / last 12 months
9	Verification	Official MAA result preferred
10	Output	Best, rank, percentile, median, gap to benchmark

Do not compare unlike categories. A Senior 100m athlete should primarily be compared with Senior 100m results. An U20 athlete should use U20 results where available. Cross-category comparisons can be shown only as an explicitly labelled secondary comparison.

7. Database record recommended for every result

Field	Value/example
sport	Athletics

8. Important data-quality rules

- Never generate or invent missing state results. If a category is unavailable, mark it as unavailable or insufficient data.
- Store DNS/DNF/DQ separately from valid performance values; do not include them in numeric rankings.
- Preserve the original competition date and source. Do not rewrite historical results when an athlete later changes sport/event/profile.
- Keep competition result, official record and statistical benchmark as separate concepts.
- For wind-assisted sprint results, store wind information when the source provides it; record eligibility should be determined separately from simple performance ranking.
- For your comparison engine, rank lower times as better for sprint events.
- Keep source URL/PDF, import date, verification status and parser/import version for auditability.

Recommended next step for One Nation One Athlete: use the official MAA result archive as the first Maharashtra data provider, import complete result books into a normalized CompetitionResult collection, and let the app calculate state-level rank/percentile dynamically from those records. Do not hard-code only the top 8 athletes shown in this research PDF.
